## **TEFILIN: CHECKING**

## **Tefilin: Checking: When**

It is customary to check <u>tefilin</u> twice in each seven year period. <u>Tefilin</u> do not usually require checking, but you should periodically check:

- *Tefilin* of the type that can become *pasul* (due to white-washed parchment).
- *Tefilin* that are moved a lot, such as from place to place where there are large changes in temperature.
- Tefilin in humid climates, such as Florida.

NOTE Ask a <u>sofer</u> for advice about any of these cases.
