How To Cover the Challot

On *Shabbat* (and *Jewish festivals*), you should place a white cover above the *challot* and another below (unless you have a white tablecloth).

REASON To recall the layers of dew above and below the *mun* that the Israelites ate for 40 years in the desert.

NOTE If you have a fancy or beautiful cover for your *challa* that is not white underneath**,** you may put a white cloth or paper towel between the cover and the *challa* in order to have a white cover above the *challa*.
