Toveling: Utensils: Stickers

Before immersing a food utensil in a *mikva*, remove anything attached to its surfaces.

SITUATION A sticker or something similar is found on a plate or other utensil after *tevila*.

WHAT TO DO

- If the sticker is less than half of the surface area and does not bother you by being there, the *tevila* is valid.
- If the sticker interferes with your use of the utensil or if you just want it removed, it must be removed and the *tevila* must be repeated.
