

Toveling: Utensils: Stickers

Before immersing a food utensil in a mikva, remove anything attached to its surfaces.

SITUATION A sticker or something similar is found on a plate or other utensil after tevila.

WHAT TO DO

- If the sticker is less than half of the surface area and does not bother you by being there, the tevila is valid.
- If the sticker interferes with your use of the utensil or if you just want it removed, it must be removed and the tevila must be repeated.
