SHABBAT KEY IN SHABBAT BELT

Key in Shabbat Belt

A Shabbat belt key should be integrated into the belt, not hanging on.

Shabbat belt: Key must be an integral part of the belt

Do Not Stack Two Keys in Shabbat Belt

Do not stack two keys in a <u>Shabbat</u> belt: put them on separate connectors in a row. See <u>Shabbat</u> Key in <u>Shabbat</u> Belt.

How To Open Door with Key in Shabbat Belt

You need to open a door with a key on a *Shabbat* belt in a place with no *eruv*.

STATUS You may not disconnect the key from the belt, stick the key in the door, and open the door in a way that the key enters a private domain.

WHAT TO DO You must either:

- Turn the key while the key is still on the *Shabbat* belt, OR
- Remove the key from the <u>Shabbat</u> belt (or take off the belt), open the lock, and then replace the key on the <u>Shabbat</u> belt before you open the door.
